1. Please contact WBA for information on splices, terminations, transitions, and additional details concerning adjacent construction.

2. Minimum and maximum values shown on dimension chart are the limits for proper system performance. Unless otherwise noted, the dimension shown at "A" Mid is the recommended installation joint opening.

3. The system and all mechanical components are supplied to accommodate 20 foot section lengths. If required, please consult with a WBA representative for the types and quantities of any chemical components needed for proper installation.
